NEW M0 LONG BRUSH

VERY THIN DECORATIVE BRUSH WITH SYNTHETIC HAIR

M0 brushes are the best friends of nail artists, as they can be used to create small designs. Long brushes are especially recommended for long and thin lines and for precise painting of French nails. Thanks to the metal case, you don't have to be afraid that the remaining material might cure in it, because this case perfectly protects against UV.

NEW STONE GLUE GEL

THICK GLUE GEL FOR RHINESTONES

The essential basis for decorating with rhinestones is reliable glue. This glue gel is a transparent, thick gel that you can safely apply close to the skin, as thanks to its texture it will not flow into the nailfolds. After curing this gel remains sticky.

How to use: Apply it to the surface of the nail, decorate with the Galaxy rhinestones as desired, then cure! The curing time is 3 minutes in UV, 1.5 minutes in LED.

MN advice: You can increase the durability of the rhinestones if you surround them with micro beads! If you are decorating a larger surface, we recommend curing the design in smaller parts!

FALL-WINTER 2023/2024

With our latest fall-winter GELFLOW collection, you can bring the fall season in your salon! With the arrival of the cool weather, the most atmospheric time of the year begins, when after a cold day all you want to do is come home, wrap yourself in your favorite armchair to read a good book or watch your favorite series. These feelings inspired our new collection, which includes colors such as **Falling Leaves (85)**, which reminds you of leaves crunching under your feet or the mischievous dirty pink, **Dusty Rose (86)**. There are also two types of purple that can be easily paired, even with each other, a really cool, deep shade, the **Psychedelic Purple (88)** and a much softer shade, **Euphoria (87)**. **Melancholy (89)** is a melancholic greyish blue, one of the most characteristic tones of autumn, which can easily paired the with the captivating pine green of **Pine Forest (90)**.

BASEFLOW PLUS

BLACK AND WHITE BASE GELS

The BaseFlow Plus Black and White shades are colored base gels.

With their pigmented, black and white shades, they will be absolute favorites of your guests. With this material you can save a lot of time, as you can skip the application of the color layers! Due to its strong pigmentation use it in 2 layers for C-curve strengthening.

Its texture is a little thicker compared to the clear BaseFlow, but softer compared to the colored Rubber Base. It does not generate heat during the curing time, so you can safely apply it even to your most sensitive guests. It leaves a sticky layer, so the surface is also suitable for the application of decorations. It can also be used for strengthening, it provides perfect adhesion for 2-3 weeks, it can be dissolved. Despite of its pigment saturation, it perfectly cures.

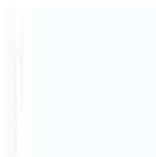

Curing time is 3 minutes in UV and 1.5 minutes in LED lamp.

COLORED BASE GEL

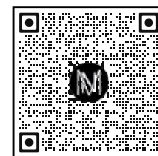

A revolutionary new, colored base gel that can be applied directly to prepared nails and can also be used for C-curve technique. It is not a gel polish color, but it can be used on its own for coloring. In this case, apply in 2 thin layers! Its outstanding flexibility has the characteristics of rubber. It is easy to spread and it has a strong adhesion. The material does not flow into the nailfolds and holds the desired curve well. Its surface is easily smoothed out even with a little help, and it perfectly fills the unevenness of the surface. It really speeds up the work because you can skip the application of the gel polish color. Its surface cures slightly sticky, we recommend the TopFlow Free product line as a top. It is more resistant to mechanical effects as it adapts well to the movements of the natural nail. Durable, yet extremely comfortable to wear. Curing time is 3 minutes in UV and 1.5 minutes in LED.

ART FOIL GEL

TRANSFERFOIL GEL

The newly developed transfer foil gel offers you quick and precise work for your decorations. The secret is in the density of the product. Its high density ensures great stickiness, it will not flow all over the nail. In case of using it on the complete surface, you can gently cover the nail with the foil. For creating abstract decorations and patterns you will need only 1-2 dots of gel. Apply the transfer foil with strong pressure movements on Art Foil Gel fixed for 30 seconds! The curing time may depend on the lamp!
